1. Introduction

1.1 Intended readers

This document covers the use of the following users:

- Employee
- Administrator
- Manager

1.2 Applicability

This software user manual applies to the Zoek Juh Köffer software, version 1.

1.3 Purpose

The purpose of the User Manual is to assist the user in using the Zoek Je Köffer application.

2. Overview

2.1 Main

The main section is the part where the user can login, If the user fills in the good information and presses the “Login” button, the user gets directed wick belongs to one of the user-rights, these are: Employee, Admin and Manager.

If the user fills in a wrong password or username and presses on the “Login” button. The user won’t be directed to another screen but gets an red error-message. This also happens when the user doesn’t fill in the password and/or username.

[IMG/ Main screen MAIN]

if the user doesn’t have or can’t recall the login information he can press the button “I can’t login”. The user gets directed to a page with the information of a admin, who can provide them with the right information.

[IMG/ Can’t login screen]

2.2 Employee

2.2.1 Employee Main

If the user logs in as an employee he gets a screen with three buttons:

- Found
- Lost
- Logout

The found will take the user to an overview of the data of the found luggage.

The lost will take the user to an overview of the lost luggage.

The logout button will send the user back to the main screen.

[IMG/ Employee Main screen EMPLOYEE]

2.2.2 Lost

2.2.2.1 Lost Overview

In the overview of the lost section there are five buttons

- Search
- Found
- Register lost luggage
- Edit

3 Requirements

No installation is required given that Zoek Je Köffer runs in your Java Development Kit.

But you need the following programs to :

- AbsoluteLayout.jar
- JDK 1.8 (Default)
- MySQL-Connector-Java-5.0.3-bin.jar
- PDFGenerator.java
